LOCATION

Winston-Salem, NC

SERVICES

Furniture Specification, Project Management, Move Management

PROJECT TYPE

Office, Healthcare, Education, Laboratory, Research

PROJECT SIZE

242, 000 SF

COMPLETETION DATE

2012

The Wake Forest Innovation Center - BioTech Place, spanning approximately 242,000 square feet, features a striking four-story-tall curved glass atrium. It was meticulously crafted to accommodate scientists, researchers, and students affiliated with the Departments of Physiology and Pharmacology at Wake Forest School of Medicine. Collaborating closely, Workplace Architecture + Design and Wake Forest University Baptist Medical Center Facilities Planning and Design orchestrated the development of a comprehensive furniture budget, selections, layouts, and bid package for the entire facility. Additionally, expert consultation was provided for furniture procurement, ensuring the seamless execution of the project and facilitating its success.
