3,500 SF

COMPLETION DATE

2016

Workplace Architecture + Design (Workplace A+D) successfully implemented a meticulously crafted Schematic Design for the project situated in Boone, NC. Their expertise covered an array of crucial elements including comprehensive space planning, meticulous selection of colors and materials, intricate millwork, detailed ceiling plans, and a strategically optimized furniture layout, all intricately tailored within the confines of a 3,500 SF interior upfit. Through close collaboration with the project's architect, Workplace A+D seamlessly amalgamated mechanical, electrical, plumbing, and structural engineering considerations into the design framework. This collaborative effort ensured not only a visually appealing and cohesive aesthetic but also a structurally sound and functionally efficient workspace, reflecting Workplace A+D's commitment to delivering excellence in design.
