LOCATION

Duluth, GA

SERVICES

Interior Design, Architecture
Programming,

PROJECT TYPE

Adult Day, Non Profit
Healthcare

PROJECT SIZE

24,458 SF

COMPLETION DATE

2019

Peachtree Christian Health responded to community needs by transforming their 18,412 square foot hospice into a cutting-edge Life Enrichment Center for adult day healthcare in Atlanta. Workplace Architecture + Design was enlisted to bring this vision to reality, leveraging our expertise in adult day health center design. Three additions totaling over 6,000 square feet expanded the facility to 24,458 square feet, seamlessly integrating with the existing structure. These additions created ample programming space, including Activity Kitchens, a spa, health and wellness areas, and flexible zones. A central 'Neighborhood' addition doubled as a multi-purpose space and facilitated the creation of an enclosed courtyard for horticultural and exercise activities. Retaining the original building's character, the renovations breathed new life into the facility, serving both older and younger adults with enhanced services and functionality. Our team oversaw design, construction administration, and furniture-related services.
