80,010 SF Office + 166,279 SF  
Shop

#### COMPLETION DATE

2021

Workplace Architecture + Design's collaboration with Collins Aerospace extended to the planning, design, and development of a new Kansas City facility. As the project's architect and design team lead, Workplace A+D aimed for a balanced work environment that fosters collaboration and privacy. The new facility incorporates various spaces, including work cafes, conference rooms, individual phone rooms, and breakaway areas, accommodating all stages of the research, development, and engineering processes. In partnership with a diverse engineering firm, Workplace A+D and Collins Aerospace have created a flagship Center of Excellence. This cutting-edge facility is poised to enhance Collins Aerospace's aerospace technologies, ensuring sustained market dominance within a collaborative, sustainable, and progressive workspace.
