Office, High Rise

PROJECT SIZE

194,083 SF

COMPLETION DATE

2022

Workplace Architecture + Design acted as the lead point of contact providing full service Architecture, Interior Design, Move Management and Contract Administration from project initiation through completion. Workplace A+D managed the project design team, monitored the schedule and provided reporting. Scope of work included the sub-contracting and supervision of engineering services, and construction contract administration. Workplace A+D spearheaded the creation of specialized move management and engaged with user groups to refine instructions, ensuring a smooth transition. Our involvement in post-occupancy surveys and project close-out procedures underscored our commitment to excellence. The highly detailed Space Programs requirement created by Workplace A+D previously was used during this project. Workplace A+D has had a long standing relationship with Inmar through multiple moves and design reconfigurations for the ever changing workplace environment.
